What is Being Installed? (Select One)	Eligible Home Types (Select One)	Eligible Existing Heating System Being Replace (Select One)
9.0 HSPF or 7.6 HSPF2 or greater <input type="checkbox"/> Single Ductless Indoor Head <input type="checkbox"/> Single Ducted Mini-Split ¹ <input type="checkbox"/> Multiple Ductless Indoor Heads <input type="checkbox"/> Multiple Indoor Ducted Mini-Splits ¹ Combination Ductless/Ducted Mini-Splits	<input type="checkbox"/> Existing Single Family <input type="checkbox"/> Existing Manufactured	<input type="checkbox"/> Electric Forced Air Furnace <input type="checkbox"/> Electric Zonal ²
11.0 HSPF or 10.4 HSPF2 or greater Ductless Heat Pump Upgrade	<input type="checkbox"/> Existing Single Family <input type="checkbox"/> Existing Manufactured	<input type="checkbox"/> Electric Forced Air Furnace <input type="checkbox"/> Ducted Heat Pump <input type="checkbox"/> Ductless Heat Pump <input type="checkbox"/> Electric Zonal ² <input type="checkbox"/> Wood <input type="checkbox"/> Oil/Propane/Gas <input type="checkbox"/> None Existing

¹ A whole-home centrally ducted system may be reported as a ductless heat pump if it is on the Ductless Heat Pump Qualified Products List. If all applicable Implementation Manual requirements are met for the Air Source Heat Pump measures, with or without PTCS, these systems are eligible for reporting as such.

² Zonal heating includes electric, non-ducted: ceiling cable, wall, baseboard, plug-in, and an electric boiler/water heater attached to a zoned hydronic floor heating system.

Addition information for Qualifying equipment/Installation requirements:

- Be installed in accordance with manufacturer specifications, including adherence to proper refrigerant charging.
- Heating seasonal performance factor (HSPF): DHPs or Ducted Mini-Split must be a split-system heat pump employing an inverter-driven outdoor compressor, with inverter-driven or variable-speed blower, rated with a minimum of 9.0 HSPF or 7.6 HSPF2. Upgrade rated with minimum 11.0 HSPF or 10.4 HSPF2.
- DHPs must be installed on a dedicated electrical circuit, according to manufacturer’s specifications and Best Practices for Installing Ductless Heat Pump Guide.
- Only one DHP may be claimed per home, regardless of the number of outdoor or indoor units installed, and regardless of the home’s square footage. For homes 4,500 sq. ft or larger, the home is also eligible for a PTCS or non-PTCS air source heat pump (ASHP) incentive.
- At the time Variable Refrigerant Flow (VFR) technologies (also known as VRV) do not qualify for the residential DHP measure.
- Provide Fall River Electric with a copy of the installed ductless heat pump invoice, showing manufacturer and model number, and a copy of the AHRI certificate demonstrating the HSPF.

Purchases must be made after 4/1/2022 and installed in FRE service territory to be eligible. All incentives are subject to availability and may change at any time. FRE reserves the right to inspect for program compliance. By signing, the Member certifies that the above information is true and accurate to the best of their knowledge.
